

Vision KC

Cybersecurity Analyst | Ethical Hacker | Security Tools & Web Developer

info.visionn7@gmail.com | +977 9766865828 | Kathmandu, Nepal | Portfolio | LinkedIn | Github

PROFILE

Computer Science student with experience in the field of cybersecurity and hands-on experience in building security tools and web applications. Demonstrated capability to come up with practical solutions to real world security issues, and a solid understanding of the principles of information security, and a history of lifelong independent study.

EDUCATION

Bachelor of Computer Science, IIMS College (Taylor's University) 01/2026 – Present
Currently studying computing with interests in Cybersecurity

High School, Science, Xavier International College 08/2022 – 07/2024
Completed high school with a strong foundation in Physics, Mathematics, and Computer Science, building early interest in logical thinking, problem-solving, and technology.

SKILLS

Web Development: HTML/ CSS , JavaScript, React Js, Next Js

Linux: Kali Linux, Ubuntu, Parrot OS, BlackArch

Digital Marketing: Search Engine Optimization(SEO), Content Strategy

Programming Languages: Python, Bash, C

Development Tools: Git, Docker, VSCode, AWS, Figma

Cybersecurity Tools: Nmap, Burp Suite, Metasploit, Wireshark, John, Hydra, Bettercap, Netcat

Cybersecurity Techniques: Vulnerability Assessment, Social Engineering, DDoS Simulation, Network Mapping, Malware Analysis, Brute Force Attacks

Soft Skills: Team Leadership, Problem Solving, Creativity, Self Learning, Communication, Analytical Thinking

Open Source Intelligence: Maltego, Shodan, Recon-ng, Social Media Intelligence

PROJECTS

Pixelhide , Python, Cryptography, Steganography Security Tool | Open Source

A professional steganography tool that hides any file type inside PNG images using LSB (Least Significant Bit) manipulation, with optional AES-256-GCM encryption and PBKDF2 key derivation for secure covert data storage.

PhishX , Python, Flask, Machine Learning, HTML, JavaScript, CSS Full-Stack Security Web Application | Open Source

An AI-powered phishing detection web app that uses Machine Learning (Logistic Regression & Random Forest) to analyze emails, URLs, and QR codes in real-time, achieving ~95% accuracy in identifying phishing threats with confidence scoring

FileGuard-FIM , Python, Watchdog, Cross-Platform File Integrity Monitoring Tool | Open Source

A real-time File Integrity Monitoring (FIM) security tool that instantly detects unauthorized file system changes including file creation, modification, deletion, and movement with dual alerting via desktop notifications and email alerts, plus detailed audit logging

DevBuddy , Python, Flask, JavaScript, HTML, CSS, Groq AI Web Application | IIMS VIBEATHON 2026 Winner | Live at vercel

An AI-powered developer productivity platform combining a Pomodoro task manager, AI chatbot (powered by Groq's LLaMA 3.3), coding challenge generator, and wellness reminders — built and deployed as a full-stack web app during IIMS VIBEATHON 2026.

FireDetect , Python, OpenCV, NumPy, Pygame Computer Vision & Safety Tool | Open Source

A real-time fire detection system that uses webcam input and computer vision (HSV color segmentation + morphological operations) to identify fire-like regions instantly, triggering an audio alarm when fire is confirmed and stopping it the moment fire disappears.

CERTIFICATES

Certified Cybersecurity Educator Professional (CCEP)

Industry-recognized certification validating expertise in cybersecurity education, threat awareness, and security best practices — issued by Red Team Leaders.

Certified Associate in Cybersecurity

Vendor-recognized certification validating foundational knowledge in cybersecurity concepts, network security, and threat management — issued by Fortinet.
